<p>The scope of the course</p>	<p>32 hours: 16 hours for lectures, 16 hours for practical classes. 88 hours for students' self-work</p>
<p>Expected learning outcomes</p>	<p>As a result of studying the academic discipline, the student should</p> <p>know:</p> <ul style="list-style-type: none"> - theoretical and applied aspects of formation and implementation the fiscal policy of the countries of the world; - basics of the organization and functioning of tax and budget systems of the countries of the world; - factors influencing the formation of modern tax systems of foreign countries; - peculiarities of calculation and payment of the main budget-forming taxes and fees (individual income tax, corporate income tax, value added tax, etc.) in the Big Seven countries; - modern orientations and principles of state tax policy in different countries of the world, the structure and powers of their state authorities in the field of taxation. <p>be able:</p> <ul style="list-style-type: none"> - to single out and explain the factors influencing the formation of fiscal policy, national tax and budget systems of the countries of the world, their possible consequences for the economy; - analyze the structure of the tax systems of the Big Seven countries, the tax elements of their key budget-forming taxes; - determine directions of implementation of fiscal policies of countries of the world; - conduct a comparative assessment of the tax systems of foreign countries among themselves and with the domestic tax system; - highlight the positive experience of using tax regulation tools in different countries of the world, provide recommendations for its adaptation in Ukraine; - to develop the conceptual principles of the formation and development of the tax and budget systems of the state. <p>General competences (GC):</p>

	<p>GC1. Ability to abstract thinking, analysis and synthesis. GC2. Ability to communicate in a foreign language. GC3. Ability to conduct research at an appropriate level.</p> <p>Professional competences of the specialty (PC): PC 1. The ability to use the fundamental patterns of development of finance, banking and insurance in combination with research and management tools to carry out professional and scientific activities. PC 7. Ability to search, use and interpret information necessary for solving professional and scientific tasks in the field of finance, banking and insurance.</p> <p>Professional competences, provided by educational program: PC 12. The ability to develop and substantiate instruments and measures for financial support of the functioning of the state, taking into account the goals of sustainable development in conditions of economic instability</p>
Keywords	Fiscal policy, budget and tax system, countries of the world, countries of Big Seven, tax regulation, tax, tax rate, taxpayer, instrument of budget and tax regulation, budget deficit, Tax Service.
Course format	Full-time education
Topics	APPENDIX (course scheme)
Final control	Assessment at the end of the 1st semester
Prerequisites	To study the course students need basic knowledge of the disciplines of the bachelor's training program ("Tax System", "Budget System", "Financial System", "Tax Accounting and Reporting", "Taxation of Legal Entities and Individuals", "Financial Analysis") sufficient for understanding of the categorical apparatus.
Teaching methods and techniques that will be used during the course	Presentation, lectures, practical classes, collaborative learning, project-oriented learning (designing one's own trajectory of preparing individual work), discussions, working with test and other diagnostic tasks, tasks on the e-learning platform Moodle.
Necessary equipment	Information and computer support: PC, tablet, smartphone or other mobile device, projector; Software: Microsoft Office programs or similar, access to the Internet, work with presentations.

Evaluation criteria (separately for each type of educational activity)

Points are awarded according to the following ratio:

Current and module control				Total – 100 points
Seminar classes 8 meetings (50 points)	Individual student work (20 points)	Students' self-work (10 points)	Modular control (20 points)	
<i>100 points</i>				

Types of work:

- seminar classes: oral and written answers, speech with a report-presentation, discussions on a given important topic, testing), students' self-work;
- individual work - a comparative assessment of the effectiveness of the fiscal policy in a country of student's choice with the domestic one;
- students' self-work: providing additional information in directions of the course topics, its oral and written presentation, writing a scientific publication with a topic close to the course;
- module control at the end of semester (testing, descriptive assessment questions).

The credit is issued based on the results of the study during the semester. The final maximum number of points is 100.

Criteria for evaluating students' knowledge	Points rating	Maximum quantity points
1. Current points for participation in seminar classes		
<i>Evaluation criteria</i>	5 points	
The student fully possesses the educational material, presents it independently and reasonably during oral presentations and written answers, deeply and comprehensively discloses the content of theoretical questions and practical tasks, using at the same time mandatory and additional literature. Solved all test tasks correctly.	5	
The student has a sufficiently complete command of the educational material, presents it reasonably during oral presentations and written answers, mainly reveals the content of theoretical questions and practical tasks, while using mandatory literature. But when answering some questions, there is not enough depth and argumentation, some insignificant inaccuracies and minor mistakes are allowed. Solved most of the test tasks correctly.	4	
The student in general possesses the educational material and presents its main content during oral presentations and written answers, but without a deep comprehensive analysis, justification and argumentation, without using the necessary literature, admitting at the same time some significant inaccuracies and errors. Solved half of the test tasks correctly.	3	

The student does not fully master the educational material. He presents it fragmentarily (without argumentation and substantiation) during oral presentations and written answers, does not sufficiently reveal the content of theoretical questions and practical tasks, while admitting significant inaccuracies. Correctly solved the minority of test tasks.	2
The student has partial knowledge of the entire course. Does not know the basics of the academic discipline in the theory and practice of management. Poorly familiar with conceptual provisions, has difficulties in understanding the main categories of the educational course. Practical skills at the recognition level.	1
The student has fragmentary knowledge of the entire course. Does not know the basics of the academic discipline. There are no practical skills.	0
2. Students' self-work	
<i>Evaluation criteria</i>	
Self-work (control work based on the results of completed independent work, writing a scientific publication with a topic close to the course) Self-work of students, which is provided for by the topic along with classroom work, is evaluated during the ongoing control of the topic in the corresponding practical session and during the writing of the final paper).	10
3. Individual student work	
<i>Evaluation criteria</i>	
The work is completed and defended according to the schedule, with explanations and conclusions and in full	17-20
The work is defended, but partially completed, in violation of deadlines or requirements	11-17
The work is not defended and is partially completed, in violation of deadlines or requirements	3-10
The work is not done	0
4. Modular control	
<i>Evaluation criteria</i>	
1. The first level (15 tasks) - tasks with a choice of answers - tests. A multiple-choice task is completed correctly if the correct answer is written on the test card. <i>1 point</i> is awarded for each correctly completed task (maximum $15 \cdot 1 = 15$ points). 2. The second level (1 task) is a task with an expanded answer (full justification of the answer). In these tasks, it is necessary to make the following, logical explanations, sufficient references, to indicate the facts from which this or that confirmation follows. If necessary, thoughts should be illustrated with diagrams, graphs, tables. Evaluation of the performance of this level is <i>5 points</i> .	20
Written works: students are expected to produce several types of written works (reports, essays, research papers, individual assignments, etc.). Academic Integrity: Students' papers are expected to be their own original research or reasoning. Lack of	

	<p>references to used sources, fabrication of sources, plagiarism, interference in the work of other students are examples of possible academic dishonesty. The detection of its signs in the written work is a reason for not crediting the work by the teacher, regardless of the scale of plagiarism or deception.</p> <p>Attending classes is an important component of learning. All students are expected to attend all lectures and practical meetings of the course. Students must inform the teacher about the impossibility to attend classes. In any case, students are required to adhere to all deadlines for the written assignments required by the course.</p> <p>Literature. All literature that students cannot find on their own will be provided by the teacher for educational purposes only, without the right to transfer it to third parties. Students are also encouraged to use other literature and sources that are not among the recommended ones.</p> <p>Scoring policy. The points scored on the current testing, oral survey, self-work based on prepared essays and other research works, points for completed individual work and control assessment of knowledge (module) are taken into account. At the same time, attendance of classes and the student's activity during practical classes must be taken into account too; absences and lateness to classes are not allowed; using a mobile phone, tablet or other mobile devices during class for non-educational purposes are not acceptable, as well as plagiarism, untimely performance of the assigned task, etc. Any form of violation of academic integrity will not be tolerated.</p>	
<p>Ensuring the achievement of program learning outcomes</p>	<p><i>Program learning outcomes (PLO):</i></p> <p>1. Use the fundamental laws of the development of finance, banking and insurance in combination with research and management tools to carry out professional and scientific activities.</p>	<p><i>Types of work and tasks:</i></p> <p>Preparation for practical session, performance of individual work, reports-presentations, participation in discussions on a given current topic.</p>
	<p>4. Search, process, systematize and analyze information necessary for solving professional and scientific tasks in the field of finance, banking and insurance.</p>	<p>Preparation for practical session, performance of individual work, abstracts-presentations, participation in discussions on a given topic.</p>
	<p>6. Accessible and well-argued to present the results of research orally and in writing, to participate in professional discussions.</p>	<p>Oral and written answers on practical session, participation in discussions on a given topic, completion of modular control tasks, public defense of prepared report-presentation and individual work.</p>
	<p>7. To solve ethical dilemmas based on the norms of the law, ethical principles and universal human values.</p>	<p>Preparation for practical session, participation in discussions on a given topic, teamwork; preparation and defense the individual work, report-presentation.</p>
	<p>9. Apply management skills in the field of finance, banking and insurance.</p>	<p>Participation in discussions on a given topic, team work.</p>

	<p>10. Carry out diagnostics and modeling of financial activities of economic entities.</p>	<p>Carrying out individual work about assessment of the effectiveness of the fiscal policy word countries, compared to Ukraine, calculation and analysis of the tax burden of business entities, providing recommendations for their optimization.</p>
	<p>11. Apply in-depth knowledge in the field of financial, banking and insurance management to make decisions.</p>	<p>Passing test tasks, modular control, preparation of individual work, reports-presentations; oral and written answers in practical classes.</p>
	<p>12. To substantiate the choice of management decision options in the field of finance, banking and insurance and to evaluate their effectiveness taking into account the goals, existing restrictions, legislative and ethical aspects.</p>	<p>Passing modular control, performing individual work, reports-presentations; oral and written answers in practical classes, participation in discussions on a given current topic.</p>
	<p>13. Assess the degree of complexity of tasks when planning activities and processing their results.</p>	<p>Performance of individual work, reports-presentations, participation in discussions on a given topic during a practical session.</p>
	<p>14. To justify the relevance of research, the possibility of achievement set goals, taking into account available resources, put forward hypotheses, argue conclusions based on research results.</p>	<p>Individual work, reports-presentations with own assessment of the research topic, providing recommendations on improving tax regulation and increasing the efficiency of the fiscal policy of Ukraine based on the study of foreign experience. Scientific publications.</p>
	<p>17. Determine the priorities of the areas of financial support for the functioning of the state, taking into account the goals of sustainable development under conditions of economic instability</p>	<p>Individual work, reports-presentations, passing test tasks, modular control</p>
<p>Questions for the control module work</p>	<ol style="list-style-type: none"> 1. The essence of fiscal policy 2. Types of fiscal policy. 3. Concepts of origin of taxes 4. The essence of the tax system in a scientific aspect. 5. The essence of the tax system in the national aspect. 6. Factors influencing the formation of the state fiscal policy 	

7. Classification signs of the division of taxes in the word countries
